DETAILED ACTION

Examiner's Statement of Reason for Allowance

The following is an Examiner's statement of reasons for the indication of allowable subject matter: Claims 1-38 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts.

The reason for allowance for claim 1 is a Failure Path connected to a Normal Path of an adjacent Working Processing Module, the Failure Path operable to provide a second signal output over the Normal Path of the adjacent Working Processing Module in response to a failure in the adjacent Working Processing Module in conjunction with the rest of the limitation set forth in the claim.

The reason for allowance for claim 27 is a first Failure Path connecting the first slot to the second Normal Path of the second slot in order to provide a signal output for the second Normal Path upon a failure associated with the second slot in conjunction with the rest of the limitation set forth in the claim.

The reason for allowance for claim 31 is an i th Failure Path that is connected to an $(i+1)$ th Normal Path of an $(i+1)$ th slot that is logically adjacent to the i th slot in order to provide a signal output for the $(i+1)$ th slot upon a failure associated with the $(i+1)$ th slot in conjunction with the rest of the limitation set forth in the claim.

The reason for allowance for claim 35 is a Failure Path connected between the first Working processing Module and a Normal Path of the second Working Processing Module, the Failure Path of the first Working processing Module operable to provide a signal output for the Normal Path of the second Working Processing Module upon a failure associated with the second Working processing Module in conjunction with the rest of the limitation set forth in the claim.

The reason for allowance for claim 37 is wherein the Protection Processing Module becomes capable of providing a signal output to the slot associated with the failed Processing Module over the Protection Bus Segments in conjunction with the rest of the limitation set forth in the claim.

Art Unit: 2113

The reason for allowance for claim 38 is a Failure Path that can be connected between the Normal Path of the first Working Processing Module and a Processing Module that is logically adjacent to the first Working Processing Module, wherein upon failure of the first Working Processing Module, a connection is formed from the Protection Processing Module to the Failure Path connected to the Processing Module that is logically adjacent to the first Working Processing Module in order to provide a signal output on the Normal Path of the first Working Processing Module in conjunction with the rest of the limitation set forth in the claim.

The remaining claims, not specifically mentioned, are allowed because they are dependent upon one of the claim mentioned above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Conclusion
